

CRE HiPP Practising Health Professional Capacity Building Funding

This Program will provide two seeding grants at \$10,000 to support research and engagement, translation engagement and capacity building among clinically active health professionals, providing research secondments. This will allow clinically active researchers to have protected time and obtain seed funding for a 12-month project commencing before 28 February 2022.

Application Form:

Applicants must be a researcher and clinically active health professional (working clinically at least one day a week or having more than 10 years' experience as an active clinician). Clinicians should have a PhD and be no more than 10 years post PhD (taking into account career disruptions). They must work with a member of the CRE HiPP investigator team – a chief investigator or an associate investigator.

Name:

Years post PhD:

Years as a clinician and type of clinical work:

Number of days currently working as a clinician:

What area of HiPP do you research/work in?

Why are you eligible to apply (no more than 150 words)?

What research project will you work on (no more than 400 words – provide details of rationale for seed funding, aim of project, brief methodology and timeline)?

Who will you work with from the CRE HiPP Investigator team and how will you work with them (no more than 400 words - including how you will be embedded in a secondment with this investigator)?

****Please submit EOI to crehipp@monash.edu no later than Friday 26 November 2021****
Successful applicants will be informed by Wednesday 15 December 2021
